Before you invest in any fund, consider how the fund would work with your other investments and your tolerance for risk.

This mutual fund is an alternative mutual fund. It has the ability to invest in asset classes and use investment strategies that are not permitted for conventional mutual funds. The specific strategies that differentiate this fund from conventional mutual funds include the: increased use of derivatives for hedging and non-hedging purposes; increased ability to sell securities short; ability to borrow cash to use for investment purposes; and increased ability to invest in physical commodities. While these specific strategies will be used in accordance with the fund's investment objectives and strategies, during certain market conditions they may accelerate the pace at which your investment decreases in value.

What does the fund invest in?

The fund seeks to provide a positive total net return over a full market cycle by investing primarily in long and short positions in North American corporate and government fixed-income securities.

The fund may create leverage through the use of derivatives, physical short sales, and/or borrowing. The fund's aggregate exposure, calculated as the sum of the following, must not exceed 300% of its net asset value: (i) the aggregate market value of securities sold short; (ii) the aggregate value of indebtedness under any borrowing arrangements for investment purposes; and (iii) the aggregate notional value of the fund's specified derivatives positions excluding the notional value of any specified derivatives used for hedging purposes.

How risky is it?

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

CIBC Asset Management Inc. has rated the volatility of this fund as **Low to Medium**.

This rating is based on how much the fund's returns have changed from year to year. It does not tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

Low	Low to Medium	Medium	Medium to High	High
-----	----------------------	--------	----------------	------

For more information about the risk rating and specific risks that can affect the fund's returns, see the sections entitled "Investment Risk Classification Methodology" and "What are the Risks of Investing in the Fund?" in the fund's simplified prospectus.

No guarantees

Like most mutual funds, this fund does not have any guarantees. You may not get back the amount of money you invest.

Who is this fund for?

Investors who:

- seek an alternative credit strategy that aims to deliver consistent and positive net returns across market cycles;
- can accept the volatility of corporate bond markets; and
- are investing for the medium to long term.

A word about tax

In general, you will have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan such as a Registered Retirement Savings Plan (RRSP) or a Tax-Free Savings Account (TFSA).

Keep in mind that if you hold your fund in a non-registered plan, fund distributions are included in your taxable income, whether you receive them in cash or have them reinvested.

How much does it cost?

The following tables show the fees and expenses you could pay to buy, own, and sell Series F units of the fund. The fees and expenses - including any commissions - can vary among series of a fund and among funds. Higher commissions can influence representative to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.
